

Mastermax Extra P&S

Self-Adhered vapour-permeable

Description

Self-adhered vapor-permeable, but water-tight underlay and air-barrier. Used as a subsidiary protective layer against moisture (liquid water penetration, wind-blown snow) and in wall structures.

Material

Vapor-permeable and watertight functional membrane with polypropylene layer protection on both side with full-surface acrylic adhesive for bonding to substrates.

Features

- Easy to install
- Prevents water from penetrating
- Remains breathable to permit unwanted moisture escaping
- Maintains a cost-effective price point
- Lightweight

Benefits for installer

- Strong UV and heat protection
- Excellent water vapor transmission
- High tensile strength
- Easy installation

Packaging

- With per roll 0.97m /38.2"
- Length per roll 38.28m / 125.6 ft
- Weight per roll 8.1 kg / 17.9 lb
- Roll size 37.13m² / 400 sq ft
- Rolls per pallet 30
- Product Code MNH-00512

Storage

Under dry conditions, protected against atmospheric exposure, especially sun-radiation and other heat sources as well as against moisture.
